Abstract
Windows HPC Server 2008 (HPCS) combines the power of the Windows Server platform with rich, out-of-the-box functionality to help improve the productivity and reduce the complexity of your HPC environment. Windows HPC Server 2008 can efficiently scale to thousands of processing cores and provides a comprehensive set of deployment, administration, and monitoring tools that are easy to deploy, manage, and integrate with your existing infrastructure. In this presentation, we will be sharing how to Windows HPC Server 2008 (HPCS) can be an efficient engineering workload OS.
